Ref: First Responder Website

Thank you for visiting the Warren County Department of Public Safety's First Responder website. It has been designed as a valuable resource and tool for First Responders in Warren County. Its also allows the Department of Public Safety and all its divisions to better communicate, share, and interact with its partners in the emergency services community.

Warren County First Responders may create a user ID and password on this website to get access to information not generally available to the general public. This includes upcoming emergency services events, training opportunities, safety alerts, computerized course registration and other specialized content.

You are also invited to join our First Responder Registry database for emergency services workers in Warren County. You may register your email address, name, home address, phone numbers, emergency contact information, affiliated agencies and titles, and any skills and specialized resources. Registry participants can then be selectively identified and/or emailed by authorized administrators based on their specific discipline (such as police, fire, EMS), title (e.g. Fire Chief), or specific skills, certifications or resources (Search and Rescue, Confined Space, ATV Owner). This information is also very helpful during disaster situations when special skills or resources are needed. Your information will not be provided to vendors for commercial or sales purposes.

Please let us know if you have any comments or suggestions for this website. Email your ideas to our webmaster at privoli@co.warren.nj.us.

Respectfully yours,

A handwritten signature in black ink that reads "Frank E. Wheatley". The signature is written in a cursive, flowing style.

Frank E. Wheatley
Director of Public Safety
